

Quality Is Our Standard

★★★★★
Industry-Leading
Lead Time for
Delivery

Since 1985, **Quality Glass and Mirror Service, LLC** has been providing quality glass and aluminum products and services to customers throughout the Midwest. Based in Omaha, we operate from an **80,000 square foot production facility** where we use top of the line tempering, insulating, cutting, and fabricating equipment to manufacture a wide variety of glass and aluminum products.

When you work with Quality, you will **experience the difference** – the highest quality products, knowledgeable and attentive employees, and responsive and caring customer service.

Wholesale & Commercial

We are a leading fabricator and distributor of glass and glazing products serving commercial glazing contractors, glass shops, and manufacturers. **We partner with the best float glass, mirror, and aluminum manufacturers**, such as Cardinal Glass Industries, Vitro, Pilkington, and Tubelite, among others, to deliver products that meet our customers' specifications, remaining nimble to adjust to our customer's demands.

Architectural Glass

Our architectural glass products are specifically designed to serve **functional and aesthetic purposes** in building and construction applications. They are critical components of a building's overall design and can also enhance **energy efficiency** and **structural integrity**.

Tempered Glass

Glass tempering is an art, starting with **the best quality annealed glass** expertly prepared for our **in-house tempering oven** to heat the glass to a high temperature and then rapidly cool it with computer-controlled precision to achieve a **distortion-free** and **flat finished product**.

Insulated Glass

Insulated glass units can be manufactured with Low-E, tinted, coated, or laminated glass so that they are **tailor made to fit your specific needs**. Our insulated glass units utilize **Quanex Super Spacer® T-Spacer triple seal technology** and a proprietary multi-layer moisture vapor seal **for longevity**.

Laminated Glass

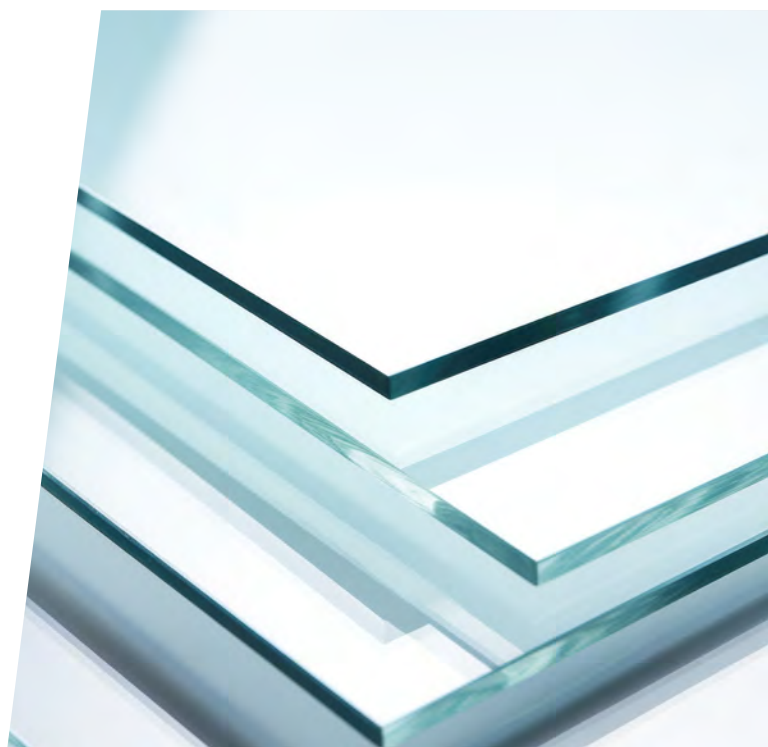

Laminated glass is a **versatile** type of glass that provides safety, security, acoustic, and durability benefits.

Spandrel Glass

Quality can customize spandrel glass with **high-performance ceramic paint** to meet exacting color specifications. Traditionally used on **building exteriors**, spandrel glass is also great for **interior design purposes**, such as backsplashes, aesthetic panels, or feature walls.

Mirror

Our **mirror fabrication** capabilities include cutting, polishing, and precision-machining for custom holes, cut-outs, and shapes.

Qual-Wall™ Glass Systems

Frameless, all-glass walls and entrances afford you the ability to **easily introduce a sleek and modern element** to your commercial, residential, multifamily, or hospitality space. With our wide range of **hardware systems**, you can create an **open-feel aesthetic** that is durable, **easy to clean**, and easy to install.

Qual-Wall™

Qual-Wall™ is a **one-stop solution** for your all glass wall and entrance needs. Our team of experts will work with you to create a **comprehensive glass and hardware package**, including shop drawings and submittals tailored to your specific project. When fabrication is complete, we will ship you the complete kit so you are well-prepared for a seamless on-site installation.

All Glass Entrances & Wall Systems

Custom-designed all-glass entrances add a **clean, contemporary look** to your interior and exterior spaces. With minimal, streamlined hardware, glass is the centerpiece, providing a **remarkable all-glass view**.

All glass walls are a contemporary way to make any **space feel bigger and more open**. They are also **endlessly customizable** and enable you to fit your setting's style and visual needs. An elegant design solution, they are also practical, requiring **minimal maintenance**, and adding acoustical insulation and privacy.

Specialty Glass

Quality sources and fabricates a wide variety of specialty glass products to meet your **technical** and **aesthetic needs**.

Glass Railings

Custom-fabricated glass railings are a clean, contemporary way to add a **secure barrier to stairs and balconies** while also reducing maintenance compared to wood or metal alternatives.

Fire-Rated

Our complete range of **fire-rated glazing products** offers attractive aesthetics and superior performance. Our team can help you select the right glass to meet the fire rating requirements specified for your project.

Bulletproof

Also known as **ballistic glass**, our wide range of bulletproof glass protects against gunfire and high- impact blasts, providing the highest levels of **safety and security** in government buildings, office buildings, banks, and even private homes.

Pattern

Our comprehensive portfolio of distinctive patterned glass can be used to add **unique design elements** to showers, doors, railings, cabinets, accent windows, and more.

Shower Enclosures

Quality Glass offers a variety of **shower doors and enclosures** to help maximize both the **space and appearance** of your bathroom project.

- 3/16" to 1/2" Tempered glass, depending on the shower style
- Patterns available, including satin, rain, cast, and more
- Customizable notches and cutouts
- Mitered edges available
- Full range of hardware styles & finishes from leading brands: Alumax, CR Laurence, US Horizons, FHC, and Portals

Frameless

Frameless shower doors provide a **sleek, modern look** with clean lines and unobstructed views, enhancing the overall visual appeal of the bathroom. They can be custom-made to fit any shower space, providing greater flexibility in design and the ability to accommodate unique bathroom layouts.

Quality Glass is here to provide you with a complete frameless glass shower solution. **You take the measurements, and we do the rest.** We will convert your measurements into digital designs for your approval and recommend hardware to give your customers the frameless shower of their dreams. Our total solution will save you valuable time so you can focus on growing your business.

Semi-Frameless

Semi-frameless showers offer a contemporary and **sleek appearance** similar to frameless showers but with the added stability of a framed design.

Typically, the door itself is frameless, and the enclosure has metal framing around the sides, top, or bottom. This makes them a **popular middle-ground choice.**

Framed

Framed showers use metal framing around all the edges of the glass panels. They are a practical, durable, and economical solution for many bathroom designs, providing both **functional** and **aesthetic benefits.**

Architectural Aluminum

Storefront **aluminum** and **glass** work together to create attractive, durable, and functional façade solutions for commercial buildings.

Tubelite Storefronts, Curtain Walls, & Doors

Quality Glass is a **distributor for Tubelite**, a leading supplier of storefronts and entrances. Tubelite has been manufacturing and distributing architectural aluminum products for the glass and glazing industry since 1945.

Quality Glass provides **superior lead times** by keeping common items in stock and ensuring that non-stock material is tracked to

meet promised delivery dates. Our **in-house technical experts** are here to provide you with architectural support to assist you in ordering the right products for your project.

Fabrication Capabilities

Quality's **in-house fabrication department** can provide fully fabricated, glazed, and assembled products, freeing up your time to focus on installation.

Since 1985, **Quality Glass and Mirror Service** has been providing products to a wide variety of customers - including glazing contractors, general contractors, window and door manufacturers, and more. We manufacture and deliver our products to a **six-state region**.
